He has obtained the Sole Agency for the famous

Bachelor Suits
The Suits with the Guarantee

and has a complete line of the very latest fashions Suits and Over-coats.

The Prices on these goods are below anything ever sold in Bassano.

Jack Torgan - Bassano.

Ben Gray Returns
To Be Publicly Welcomed
At Mass Meeting of
Citizens on Friday Night

Corporal Ben Gray returned to Bassano on the early morning train last Friday, thereby depriving the citizens of an opportunity of giving him a rousing welcome at the depot. His welcome however has been none the less cordial for being made individually.

Ben shows the marks of the terrible experience he has been through, and the suffering he has endured in the doing of his bit is evident in his features, but, nevertheless, the old spirit of adventure and gaiety burns just as clearly as ever, and he declares that a few months of Alaskan climate will put him in first-class shape again.

The citizens, at a meeting held on Monday, unanimously decided to mark their appreciation of Cor. Gray's return, and, incidentally to show they realise to the full the extent of the sacrifice he, and every other Canadian soldier has made and still is making, by a presentation, which will be made at a meeting held for that purpose on Friday.

There will be a general Social Evening, to which everybody is invited, consisting of cards, a short programme of music, and a luncheon which will be followed by a dance.

We understand that Fred Owen who has been back for some time now, will be present also and the privilege of greeting the two veterans, we are sure will be eagerly taken advantage of by our citizens.

Chautauqua Dates Set
Make a Point of Securing Your Ticket for this Event.

The visit of the famous Chautauqua organisation to Bassano has been timed to enable every farmer in the district to be present without sacrificing time which should be spent on the land.

November 21-22-23 are the days which have been set aside for Chautauqua and they will be red-letter days in the memory of every person who attends the series of entertainments which Chautauqua will provide.

Chautauqua aims not merely to entertain but also to educate and instruct and it provides the greatest form of education in the shape of the most desirable form of entertainment.

Each session will be the best and everyone who has the privilege of attending each session must benefit largely by their experience.

The programmes are calculated to appeal to everyone and they include some of the best lecturers and musicians on the continent.

There is sure to be a great demand for tickets and people who wish to take advantage of this great opportunity are strongly urged to secure their ticket at once.

The committee for the sale of tickets are G. W. Boyd Manager of the Union Bank, M. E. LaZerte, but tickets may also be obtained of any of the business men.

Put down the dates in your memory and don't forget to get your ticket AT ONCE.

Postponed

The Annual Meeting of the Red Cross Society was postponed on account of the inclemency of the weather to until tonight, at 8:30. The Tag Day for the British Red Cross will be held tomorrow instead of today.

TOWN COUNCIL
Councillor Connally Reports Indian Agent Gooderham Favorably disposed towards Sale of Lands

A Meeting of the Council was held in the Town Hall on Monday last, with Mayor Travis in the chair and a full attendance of councillors.

The minutes of the last meeting were read and adopted, accounts presented to Finance Committee, and the following communications and reports were read:

Communication from the Provincial Engineers regarding the grading of road south of Bassano was read and ordered to be tabled pending investigation.

Communication from Mrs Harris making application for the purchase of Lots 10 and 10 Block 24, which have been forfeited to the town for non-payment of taxes, offering the sum of \$40.28 for the two lots. The Council decided to accept the offer subject to all the conditions being complied with according to law.

Report from the delegate appointed to interview Mr. Gooderham, Indian Agent, re the coal mine and other matters of importance to the town was read as follows:

"An delegate appointed to interview Mr. Gooderham re coal mine and other matters, I beg to report, that Mr. Gooderham saw fit to permit another entrance to be made at the mine, and also promised to lay the main roads to the warmer of Indian Agent's house and the mine, and, further, before the Indians are fully favorable to the town within a month." Moved by Conne, Skerrett-Hardoff that the secretary convey the thanks of the Council to Mr. Gooderham for his kindness and express the hope that at some time in the near future the Council may have the pleasure of reciprocating.

Mr. Murgatroyd was instructed to go ahead and prepare the mine for miners, under the supervision of the Public Works Committee. (This should ensure the work being done expeditiously, anyhow).

The luxuriant growth of weeds which the C.P.R. have cultivated on their property, and which has been such an attraction for the past few months, was the next subject of discussion and the secretary was instructed to write to the Department of Natural Resources suggesting that it was high time the crop was harvested. The state of the side-walks leading to the depot was also suggested worthy of immediate attention.

After which "John" made his customary motion and the Council adjourned.

Co-operation Required

Military Service Act will Work Smoothly when all the People Realize its Benefits.

Calgary, Oct. 18.—It is by the co-operation of all concerned that the Military Service Act will be applied most effectively and with the least possible delay and trouble. This is plain, now that the programme to be carried out has been explained to the country in its broadest sense.

The men to be selected themselves, their parents or near relatives or their employers are being called upon to assist in the business-like operation of the Act, and the kind of response that is made to this call will be an interesting indication of the general interest and determined spirit of the Canadian people. Leading authorities here are unanimous in agreeing that, when the people get to understand the ultimate value of the Military Service Act, its fairness and its advantages, it will work as smoothly as the country will hardly notice it in application. O. 10.

Ireland's Round Towers
Dotted Every 12 Miles Around Are Reached by Ladders

It does not appear to be known where or why the round towers in Ireland were built, but some believe that they were built by the Danes to watch towers and places to which to go for safety in time of danger. Many of them have been broken off and those which show the cone top intact have mostly been rebuilt at about ten or fifteen feet from the ground, the others being left by ladders. After the people had climbed up them, they drew their ladders up after them so that the Danes could not get into them. Some of the Danes who frequently invaded the country, the tiny windows were broken out so that they could not get into the top. About eighty round towers remain in Ireland, but only a few are now perfect—several of them are ruined.

Minard's Liniment Cures Dandruff.

Sweet Corn Commercially Profitable
Experiments have demonstrated that sweet corn can be successfully grown in large quantities in many parts of Western Canada. In the last year, in Southern Alberta certain varieties grow exceedingly well. On their farms, two brothers, Mr. and Mrs. John W. Dodd, of the Bassano KIDNEY PILLS Company, have had good crops every year since 1914, with the best being in 1916. Their experiments. Their average yield is from 1,000 to 1,500 bushels per acre. They are now marketing their product to the neighboring towns of Medicine Hat, Calgary, Banff, Moose Jaw and Regina, where there is an eager demand for it.

Austrians Increasing In Brutality

New' Bidding Fare to Jews Outside Germans in Czechy

Has the last for savagery taken hold of the Austrian officer as it has of the German? The Austrian, Rostschlag, rose in his place that assembly and stated:

"On the 20th instant, according to my witnesses, I lay before the minister of defense an account of recent operations in which our army commander Lieutenant Artillery at Nilus, near Olmütz, sent his troops to begin the day by an unmerciful and sound thrashing to the men. The day before, twenty rations of the operations by laying the ears of the soldiers."

"On the 21st, the company at Delbrück, was found to have twenty rations. Lieutenant von Hohenfels upon unseated the whole battery, and the soldiers, with dog whips, flogged them. They disclosed who had consumed the rations, and fell to the ground unconscious during the incessant whipping."

Even Hofer kicked them as they lay, and another officer hoisted his horse, shouting twenty men with thick ropes to the top of a railway truck, whence they were cast down. This punishment was inflicted by order of Lieutenant Carl Ratisinger, and the wagon was guarded by sentries so that the local population should not interfere.

In the evening, when Josef Tahal, a member of the sanitary corps, was summoned to the camp to be flogged, Captain Groiss cried: "You swine! Why are you laying this curse on Tahal?"

"I am a Jew, but a soldier of twelve years service."

Then Captain Groiss

atching a rifle from the hands of a sergeant, felled Tahal to the ground with a blow on the head, and then

shouted, under the threat of a whip, "Tahal, eat out. One

more time we were in Siberia, and

no longer to carry arms. Ammunition preparation brings prompt help."

Live Stock Depletion

Nations of Europe Now Rapidly

Deglaring Their Supplies

The U. S. food administration has received directly from the French government figures showing the damage done to France as a result of the war.

On December 31, 1916, according to these figures, the number of cattle had decreased to a total of 13,420,000 as compared with 14,807,000 on December 31, 1914. In 1915, the number decreased to 13,045,000 and in 1913 to 13,600,000 in 1912 to 14,261,000 at the close of last year or 90 per cent.

The following statement gives a summary of meat in France at the present time, estimated by the French government:

11,166 pounds of mutton, and 21,48

pounds of pork.

The figures emphasize the

recent statement of the U. S. food

administration that the nations of

Europe are now rapidly

depleting their supply of live stock,

and must import largely upon the

United States for their meat.

Editor - E. G. ALLEN.

Why We Should Economise

Canada and the United States probably will be able to provide for the Allies' requirements of cereals other than wheat, during the next twelve months.

The Allied peoples themselves have been economizing with wheat and wheat flour. As Lord Northcliffe said in Montreal, "There is no such thing as white bread in the Old Country, from the King's table downards." Other cereals are being used but they cannot be used alone for bread. The Allies must add them to wheat flour to make the war bread now in universal use in European countries. Except in Italy, where the people normally consume much corn, there are few corn mills in Europe. Cornmeal, not being a durable commodity, cannot be shipped across the ocean in great quantities.

The Allies must have a wheat flour base for their war loaf. Unless the people of Canada and the United States are willing to substitute other cereals for part of the wheat flour which they normally consume, they will be buying even war bread to many thousands of people. Substitution of at least one pound of other cereals for one pound of wheat flour weekly, per person, would save a very large quantity of wheat for export. It would still be far short of meeting the normal consumption requirements of the Allies but it would save the situation.

The Municipal Election

The Municipal Elections will soon be here and we had evidences that the townpeople are not ignorant of the fact, for we have already heard suggestions as to likely candidates, and we have also been advised of the formation of a party and a ticket or programme.

This later we unhesitatingly condemn as being fatal to the best interests of the town.

We need men not parties, for as soon as a party enters town politics we have the town pledged to the party in place of men pledged to the town.

The only pledge we should require from candidates is the personal pledge that they will endeavor to further the best interests of the town without regard to any particular interest.

The coming year might be a year of expansion; on the other hand there are many who prophecy that financial stringency will strike us harder than ever. We shall need men therefore who are capable of combining enterprise with the strictest economy.

Particular Men REQUIRE Particular Clothes.

The Ford is Now Considered a Necessity for Large-Scale Farming

WETHER you are doing work on a large scale, or a small scale, you endeavor to reduce the delays of your farm machinery to a minimum and save time. A Ford will assist you in doing these two things.

If your tractor runs short of gasoline, the Ford will bring a few cans right to the spot and greatly shorten the delay. Or if you need a repair, or some new plow points, you can "run" the errand to town and back in one-third the time it would take with a horse and rig.

With a Ford you can supervise the work on your ranch much more thoroughly. You can get your mail and supplies oftener, and take more enjoyment out of prairie life. A Ford will do all these things and many more, and at the same time save you money.

The strength and endurance of the Ford has been proved the world over. It is equal to the western roads and the distances.

The Ford is the car for the Western Farmer.

BUY AN IRRIGATED FARM

From the Canadian Pacific Railway

BECAUSE

Irrigation makes the farmer independent of rainfall, and insures good crops, not occasionally, but EVERY YEAR.

Irrigation makes possible the successful culture of alfalfa, the king of silage, which insures good returns in dairying and mixed farming.

Irrigation means live, growing and cross-seeded grain, with all the advantages of densely populated agricultural community.

Irrigation in the Canadian Prairie makes possible a crop which is no longer an experiment; the years that it has been tried having absolutely demonstrated its success.

Contract can be paid off before maturity if desired.

You can buy irrigated land from

the Canadian Pacific Railway at prices up to \$60 per acre, with twenty years to pay and the privilege of a loan of \$2,000 for improvements (6% interest); no principal after first payment until end of fourth year, reduced

interest if settlement conditions are complied with, and no water rental for five years.

Contract can be paid off before maturity if desired.

This is the most liberal offer of irrigated farm land on record.

For full particulars, apply to

Allan Cameron, General Supt. of Lands.

Canadian Pacific Railway, Department of Natural Resources

THE PROPER WAY TO USE

COPENHAGEN CHEWING TOBACCO

Copenhagen Chewing Tobacco is
entirely different from the ordinary
Tobacco. It is old, rich,
and delicious.

It is made of the best, old,
rich tobacco leaves, which
in small grains, it imparts its
strength and flavor more freely and
fully than any other tobacco.

For this reason, Copenhagen
is chewed; but is placed in the mouth
as though it were a cigarette.

A small pinch of it is necessary
to thoroughly satisfy, and those
who have once tried Copenhagen
will always prefer it. At the same
time, should a person be unable to
use a pipe, otherwise "Copenhagen"
will always have the most
decided strength.

"It's the most economical chew."

Should Use Fish

Substitution of Fish to Save Meat
Is Recommended

The campings to substitute fish to
make meat more palatable are successful.
Plans are to be made for transportation
of fish to camps, and arrangements
for the extra service were
made at a special meeting of the
controller of Canada and representatives
of the railways and hotel
proprietors.

The new arrangements include in
creased supplies through special
trains when necessary to the board
to interior points. The increased
water distribution of fish and
will insure the arrival of the fish at
the time required.

While substitution of fish for meat
is a comparatively new thing in Can-
ada, there is every important
demand to conserve meat for
export to the Allies, who have
been compelled to buy up all
stabilized market conditions in inter-
national points that an adequate and steady
supply can be obtained.

On the 1st of April, 1917, the
Government made the new arrangements
on, made the new arrangements in
perpetuity.

A little boy, who was trying to tell
a friend how absent-minded he
was, was thinking about nothing; and, when
he remembers it, he then thought
that he was something entirely different from what
he wanted to remember!

Immature Potatoes Are Better for Seed

Experiments Prove They Yield Better
Than Hill Selection Adhesive

Potatoes which have not fully matured give better yields than fully matured ones, according to results of experiments conducted at the Central Agricultural College at Greenwich, England. The method of planting immature potatoes is quite common in England.

The farmers of this country should follow some such practice, provided they will not plant too early. When the potatoes are about to begin to ripen, the most vigorous tops above ground usually mark good yield of potatoes underground.

The time the selection is made, providing it is late enough in the autumn to allow the plants to ripen until planting time next spring. Where the potatoes are not harvested, the tops are of no value, size and yield well, which should be kept for seed, unless it should be necessary to have them to mark the ground.

It is recommended, however, that the seed be taken from the common varieties, as is often the case. F.C.N.

In the case of insectivorous birds, the Canadian government introduced the Migratory Bird Convention in 1911, to carry out the provisions of the convention, and this measure has recently passed both houses of the Canadian Parliament. It is given to the hill, regulations will be promulgated fixing closing dates.

In the case of insectivorous birds, it will be unlawful to kill them or to possess them during the closing year. The close seasons on ducks and geese will not exceed three days, and the opening and closing will be fixed in accordance with local conditions and areas, as far as possible, by the provincial authorities in the different provinces. On a number of birds, as the raven, the crow, and many others, the shore birds, with the exception of certain plover and yellowlegs, will be closed.

This close date at which they shrivel up the corals or callus with their feet, when shot, will never again be given to you, as you like; for corn will never again be given to you, as you like; for corn will never again be given to you, according to the Canadian authority.

It is recommended that a few drops of oil, called freeze, applied directly to a tender, aching corn, instantly stops the pain, and soon the entire corn, root and all, lifts out.

This close date at which they shrivel up the corals or callus with their feet, when shot, will never again be given to you, as you like;

But last year," he said, "I had had a two
years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I nudged him, as I have done to
rid him, home to town, and he
said, 'But last year,' he said, "I had had a
two years' course in agriculture, and
I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

I've been home a great deal, of
course, and I've been working to the wagon load
of double sideboards."

"I

WILL NEED OUR WHOLE STRENGTH TO WIN THE WAR FOR DEMOCRACY

OUR CAUSE WILL NOT TRIUMPH AUTOMATICALLY

To Believe That Democracy Must in the Nature of Things
Triumph is a Dangerous Illusion, and if Every Effort is Not
Put Forth To Win, the Cause Will Surely Be Lost

"Viewed from the political angle of vision the war is clearly a judgment, perhaps the final conflict between the democratic and the autocratic principles. It is the better part of French revolution fought over again, but on a vastly greater scale and be more intense. The two sides are not able to live in one another, in the course of the war both principles have had to make their mark, and at the same time displayed their weaknesses. Democracy has shown its power under great stress, and it has shown that with one another, in the pursuit of a common cause, it can stand that a moment when most of its ideal aims, like the same peoples were unable to stand. The war has shown the multitude of party interests, in the way democracy has revealed in detail the whole submarine campaign, the course of which has been shown the weaknesses which come from divided counsels, from alternating views, from lack of mutual trust of its men. And yet it has not been daunted by the difficulties of the task, nor has it given up these causes, but has held on to its task in spite of them all; and it has done so evidently to deepen the impression of its strength. Autocracy presents the same picture, but in a different man model, at all events, it has displayed an immense efficiency in the management of its resources, which has proved itself to be thoroughly immoral, and revealed its true nature as a system of exploitation and violence in the life of nations, thereby condemning in itself to eventual destruction.

"Clearly it is futile to attempt any estimate of the effects of the war on democracy, or of the effects of democracy on the war, at the same time its parallel effects on autocracy. The two things must be kept in mind, but the question is, what is the practice of each of these parties to look at the matter exclusively from its own point of view? We must admit that most discussions of the question fall into the field as to whether the war they are waging is "right" or "wrong".

But that is not the view of German autocracy. It has not lost faith in itself, and it has not lost the "little work" which is needed to prove that it is a good thing. Those Germans who defenders of autocracy are pointing out that they are not to blame, and that what is more, they are pointing with contempt to the very idea of democracy. The one of the objectives of this war, as far as this government is concerned, is to see that there is an international law.

In the Indianapolis News we find this:

"The Indianapolis News was recently vindicated in its right to publish the Indianapolitan News.

Conservation of Food

Ontario Making Rapid Strides To- ward Food Saving

Ontario is making rapid strides toward food saving. In the last few days we are doing many new and important things. The first is the practice of each of the parties to look at the matter exclusively from its own point of view. The second is that most discussions of the question fall into the field as to whether the war they are waging is "right" or "wrong".

But that is not the view of German autocracy. It has not lost faith in itself, and it has not lost the "little work" which is needed to prove that it is a good thing. Those Germans who defenders of autocracy are pointing out that they are not to blame, and that what is more, they are pointing with contempt to the very idea of democracy. The one of the objectives of this war, as far as this government is concerned, is to see that there is an international law.

In the Indianapolis News we find this:

New Day in Agriculture

Elimination of Manual Labor Making

Farm Popular

A revolution in Ontario, farming quite as great as that in France, is being made. The hayrake, the mowing machine, and the self-binder is nearing completion. The milking machine, the tractor, and the plow with hand labor in the most arduous part of dairy work, will soon be as common as steam traction. The value of the tractor as a means of plowing the work of the field is well known. The example set by these farmers is certain to spread. Right inherent in nature. This is a most dangerous illusion, and if we insist on it, we shall be beaten. The superiority of the democratic cause is not to be taken as a fact established in the world, but as something which is to be established in the world.

Rather is it the very question with the issue of the war is going to determine the issue of the war decided in favor of democracy unless every democrat puts the last ounce of effort into the struggle."—P. J. P. Jackson, in Land and Water.

Until Ergo—So we just not lack from New York. What is the difference between the city and the country?

Uncle Ebeneezer—Well, in the country you go to bed feeling all in' and get up in the morning, and in the city you go to bed feeling all in' and get up in the morning.

Then if you grabbed a lamb by the leg you would be pinching gamboing joint, wouldn't you?

Lucy On, Macduff! "Fool!" "Yes, my child!" "What's the matter?" "At times, my son?"

"Then if you grabbed a lamb by the leg you would be pinching gamboing joint, wouldn't you?"

THE MAIL, BASSANO, ALBERTA

Local and Personal.
G. Thomsett was a Calgary visitor on Tuesday.

Mrs. W. R. Playfair was a visitor to Calgary this week.

Mrs. Wm. Forster was a Calgary visitor this week.

The Rev. W. S. Brooker will take his subject on Sunday next "The Christian Programme".

Miss Anna Hamilton of Calgary and visiting with the Misses Millie and Pearce for the week end.

We call the attention of our readers to the Proclamation appearing in this issue, and earnestly advise a careful study of its clauses.

Jack Tuzen has leased the store recently vacated by S. Brosseau and intends to put it to a stock of high class Girls' Furnishings.

We understand that the Town office will be working in a very short time, now that permission has been granted to cut another entrance in the wall.

The weather-worn visitor visited Bassano on Tuesday bringing with him a sample of new season's goods, in the form of a snow storm, which has just tickled the furnaces immensely.

A Harvest Thanksgiving Service will be held in the Anglican Church on Sunday next at 7:30 p.m. Any contributions of flowers, fruit, grain etc. for decorative purposes will be gratefully received.

Chautauqua will arrive in Bassano on Nov. 21st, and will continue for three days. A meeting of those citizens who signed the guarantee is called for Tuesday next at the Town Hall.

Rev. A. C. Swanson left on Tuesday for Calgary where he will attend the Bi-monthly Provincial meeting of the clergy of the diocese, which is being held from Tuesday to Thursday of this week.

The Woman's Auxiliary of the Anglican Church will hold a Sale of Home Cooking, and have afternoon tea from 3 to 6 Saturday Oct. 29th at McKees old Hardware Store.

The Food Controller says eat more fruit—for your health and for your country's sake. The last fruit you can buy today is MacIntosh Red Apples. We have especially good shipment. McKeekes the Grocer.

The Brooks Bulletin has struck another rich vein of humor! In the last issue Bro. Naslitt suggests we should try the effect of a non-tariff in E. flat on the Germans. But, if he is so anxious to drown them, why not use a D flat bulletin?

The men chosen for Bassano to act as judges for the Military Tribunals had by Thursday Charlie had the wire red hot again, pulled off a dozen new stunts, and dropped in to renew his subscription to the Mail, which, we claim, to be a most excellent wind-up.

Charlie and Mrs. Nutter returned from their vacation Wednesday last, and by Thursday Charlie had the wire red hot again, pulled off a dozen new stunts, and dropped in to renew his subscription to the Mail, which, we claim, to be a most excellent wind-up.

Advertised, resident in Bassano, wants the use of a piano for the winter months. Apply to Post Office, Box 218, or to the Mail Office, Bassano.

There is no fruit more palatable than good eating apples; there are no apples more delicious than MacIntosh Reds. There is not a finer shipment in the country of MacIntosh Reds than the one we are now selling. Get in on it. McKeekes the Grocer.

The Food Problem And Its Challenge

Prepared by the Educational Department of the Food Controller's Office for The Farmers Mail

Every Canadian owes it to Canada and to himself to understand the essential facts of the food situation. He should know what his problems are and how to meet them better. Food control under present conditions is an attempt to organize the food resources of this Country so as to meet most effectively in the conduct of a war. It is also intended to help the Government public opinion must be educated first to the facts and then to a proposed application of these facts in the title of the individual.

We have been told that the world food situation is a grave emergency. We have been told so much about grain differences during the past twelve years that our sympathies are not so easily aroused to the point of sacrifice as they used to be. We have realized that the world is not so well off as we used to be. The price of grain has risen from \$1.15 per bushel in Canada to \$1.35 per bushel in America.
